

SUMMARY

Summary: Goal-oriented developer with proven ability to leverage full-stack knowledge to build interactive applications. I have experience working on teams using Agile Scrum methodology and facilitating cutting-edge engineering solutions.

PROJECTS

Material-UI-recipes:

<https://itsdayo.github.io/Material-UI-Recipes/> Create a recipe or browse through original recipes to see the ingredients or instructions on how to make meals. Styled with Material-UI and written in React.

React Native Calculator: <https://github.com/itsdayo>

This project showcases my front-end architect skills along with expertise using react hooks. It uses modern best practices such as React and styled components.

Web maker- An application written using the MEAN stack using Amazon S3. Create an account and then customize websites, pages, and widgets for later viewing. Save photos, videos, and text of your favorite articles on the widget page. <https://app-maker-do.herokuapp.com/>

EXPERIENCE

REDKO

Beverly Hills, CA

Full Stack Developer Intern

01/2021 to 06/2021

- Developed highly scalable and interactive UI components.
- Developed the Full System Lifecycle which included gathering and full project documentation
- Implemented code written in React, React Native, NodeJS, and NoSql to develop mobile and web applications.

CARSWOOP

Santa Monica, CA

Junior Software Engineer

08/2019 to 11/2019

- Build upon an application and web platform using React for the frontend and Node Js/firebase for the backend.
- Developed a full-stack application with technologies such as CSS, JQuery, Bootstrap, and HTML
- Utilized MapKit JS to display mapping in real-time for the location of drivers in the system.
- Took advantage of using REST APIs to modify, insert, delete, and retrieve data.

NEXT ROUND

Culver City, LA

Full Stack Developer

04/2019 to 08/2019

- By using React, global state Redux, C#, and MySQL, I designed, developed, and built software code to provide new functionality Used object-oriented design principles to develop a web application using the efficient, modular .Net ecosystem.
- Implemented back-end service solutions using C# and Managed Microsoft SQL server Implemented a feature for users to view the locations of fields and venues and associated map route using the Google Maps API
- Created search tools and algorithms that SQL schemas can discover relationships and keywords for searched queries.

EDUCATION AND TRAINING

BACHELOR OF SCIENCE: MATHEMATICS

Sep/2011-May/2016

University of Massachusetts Dartmouth

MASTER OF SCIENCE: INFORMATION AND COMMUNICATION TECHNOLOGY:

SOFTWARE DESIGN AND PROGRAMMING

Sep/2019-Jan/2022

University of Denver

TECHNICAL EXPERTISE

Computer Languages: JavaScript, Python, SQL, Typescript, Java, GraphQL **Backend:** NodeJs, Ruby, .Net, Express, Postgres, MongoDB, MySQL

Frontend: React, Angular, SASS, HTML5, WordPress, CSS3 ES6, Redux, JQuery, Advance Rest Client, Bootstrap 4.0, Mobile: React Native **Versioning and Hosting:** Git, Github, Heroku, Netlify **Build tools:** Webpack, Babel
